PHASE III: Use any of the available plans OR custom design your home, subject to approval by design committee.

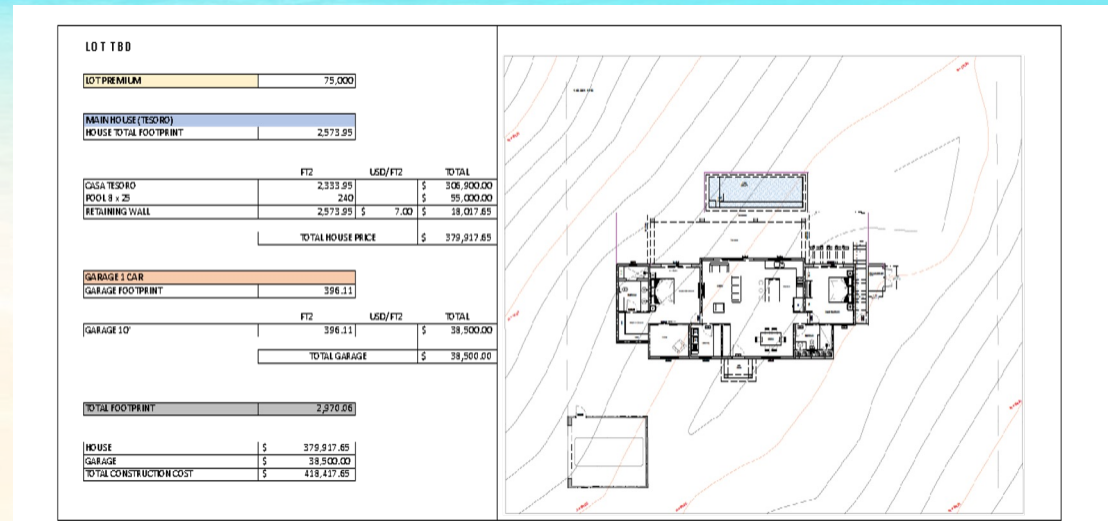

Custom homes in Phase III require a \$5,000 architecture fee and a \$350,000 minimum construction spend.

Prices subject to change due to changes in material costs, etc. Final price including any upgrades to be determined at time of construction contract signing.

# Pricing the Finished House

- The Total Home Price includes:
  - Lot premium
  - Base home price (includes all interior living and outside covered areas)
  - Retaining wall (based on home footprint and location on a specific lot)
  - Any upgrades and additional terrace
- After a new lot reservation is signed, we:
  - Provide a lot fit drawing of the selected structures on the desired lot
  - Calculate the retaining wall height and cost
  - Adjust the position of the home to optimize view, lot arrangement or budget
  - Present a Construction Worksheet for signature (budgetary quote \*)

\* Budgetary quote is valid for 30 days; client must sign construction contract prior to expiration of quote.

# Retaining Walls

- Sloped lots require a retaining wall to support the home correctly
- The cost depends on the slope of the lot and the home footprint
- The cost = the average of the wall height x the footprint in ft<sup>2</sup>
- The first foot is included in the base price
- Each additional foot adds cost
- Example:
  - Home footprint = 2,500 ft<sup>2</sup> (incl terraces)
  - Max retaining wall height = 6 ft
  - Average retaining wall = 3 ft (Type C)
  - Retaining wall cost = \$25,000 USD

Retaining walls (price/ft2)	
Type A: ≤1'	\$0.00
Type B: 1-2'	\$7.00
Type C: 2-3'	\$10.00
Type D: 3-4'	\$13.00
Type E: 4-5'	\$16.50
Type F: 5-6'	\$20.00
> 6' needs to be calculated	

Prices subject to change due to changes in material costs, etc.

# Standard Features Included in All Homes

Upgraded interior and exterior finishes are also available upon request, subject to approval by the design committee.

# Building Guidelines

## CONSTRUCTION GUIDELINES

- All lots are sold with an attached home plan
- Single story homes only (5 meter max height restriction)
- 25% maximum coverage of lot for AC construction, including garage and patio
- 50% maximum coverage including pool, carport, driveways, and hardscape
- Lot line setbacks: 5 meters from front road, 2 meters from other sides
- Building envelopes in place to ensure maximum views
- Construction must begin within 6 months of Phase opening and within 90 days of contract signing once Phase is open

## HOME PLANS AND CHANGES

- Final drawings and plans to be submitted and approved by the buyer and design committee before start of construction
- Exterior structural design, colors and finishes must be approved by design committee
- All interior and exterior selections and finishes must be chosen before start of construction
- All design changes must be approved by buyer and builder
- Changes requested after final plans are approved and selections made are subject to change fees.
